Yes, I am in tomorrow. I have meetings 10 – 11 and 1 – 2, open all other times.

We can discuss congressional briefings as well if we want to launch those soon.

Hi Robert

Got your message. I'll call you later when I get a break. Are you working tomorrow?

Mike

Hey Mike,

We held a kick-off call with EPA R8 HQ and SKEO for the CIC development for CFAC. Everyone seems pretty excited to start on the project but we may have some timeline issues. Because the date of the current TASC contract ends June 21, I wrote the TASC Directive to see if we could get the community interviews done before that date. SKEO is checking their availability but cautioned us that they may not be able to make it. In that case, we can have them start other parts of the CIP this term and we can write another TASC order for the next term (After June 22) to schedule the interviews and finish the remaining work.

The next step in the process is for them to draft a Project Approach. They should have that to us by the end of next week and we can discuss it and provide feedback.

As we get nearer to setting up interviews and community involvement actions, we should identify our mutual availabilities and schedule. Let's plan to follow up after we receive the Project Approach. Or, feel free to contact me anytime.

Thanks Mike.
